

ABSTRACT

R-NSAID ESTERS AND THEIR USE

5 The present invention concerns esters of R-enantiomers of a non-steroidal
anti-inflammatory drug, which is substantially free from the S-enantiomer. The
compounds of the invention may be used in treating a disease or illness in a
mammal. To this end, a composition comprising a compound mentioned above, or
a pharmaceutically acceptable salt thereof where salt formation occurs, is
10 administered to the mammal in an amount sufficient to elicit a chemopreventative
effect or a chemoprotective effect or a therapeutic effect or a prophylactic effect.
